(57) Abstract :

The present invention relates to a liquid dispensing device, comprising a vessel 1 installed in the device for containing a beverage, a container 3 attached to the vessel 1 for storing a sweetening agent, a metal plate 4 arranged with a heating element 5 connected at a base portion of the container 3, wherein the heating element 5 heats the agent in for converting the agent to a liquid form, a pump 6 associated with the vessel 1 for transferring the liquid agent to the vessel 1 via a hose 7, multiple buttons accessed by a user for selecting amount of the sweetening agent to be added in the beverage and a microcontroller associated with the unit for receiving input from the user through the buttons in order to actuate the pump 6 for completing the addition of the sweetening agent in the beverage.
