(57) Abstract :

The present invention relates to an automatic nail pulling device, comprising A body filled with incompressible fluid having at least two openings in left side and right side of the body, wherein the openings connected through a pipe, At least two hydraulic pistons 1, 2 installed to the body in the openings to perform hydraulic mechanism, wherein at least two rods connected to each hydraulic pistons 1, 2 having a magnet at bottom of the rod, a detachable v-shaped jaw structure 3 attached to the rod via the magnet for removing nail. Primary piston 1 used to exert pressure on the incompressible fluid, wherein primary piston 2 lift because of pressure created by primary piston 2 on the incompressible liquid.
