(57) Abstract :

The present invention relates to a retractable air conditioner covering device, comprising a cover 1 supported with a circular track 2 positioned on a first side of an air conditioner, wherein the cover 1 moves along the track 2 in a downward circular motion up to a second side of the air conditioner for shielding the conditioner from dust, at least two motorized wheels 3 positioned on end corners of the track 2 for assisting in the motion of the cover 1, at least one rod 4 attached to the first side of the conditioner for providing support to the track 2 along with performing rolling/unrolling of the cover 1 to shield the conditioner and a user platform configured with a control unit accessed by a user for actuating the motorized wheels 3.
