(57) Abstract :

The present invention relates to an ear protection apparatus comprising a housing having a first portion 1 and second portion 2, wherein the first portion 1 resides in an outer ear and the second portion 2 extends in interior of the ear of a user, an insert unit 4 attached to the second portion 2 for preventing water from entering the interior ear while allowing audible tones to pass through the second portion 2; and a silicon layer 3 fabricated within periphery of the second portion 2 to provide a proper grip between the unit and second portion 2 in order to prevent entry of water within space between the unit and second portion 2.
