(57) Abstract :

A self-sharpening cutting apparatus comprising a handle 1 in association with said apparatus for providing grip to a user holding said apparatus, a trigger 2 element connected with the handle 1 wherein the trigger 2 is pressed manually to extend and retract blade 7 encased within a casing 6, a spring 3 inter-linked between the handle 1 and trigger 2 for assisting the trigger 2 in movement of the blade 7, and a sharpening material 8 adhered on surface of the casing 6 wherein the material sharpens edges of the blade 7 upon extension and retraction of the blade 7.
