(57) Abstract :

The present invention relates to a vehicle tent forming device comprising of an umbrella shaped canopy 1 for enclosing a vehicle, at least two inflatable tubes 2 for providing support and thereby giving shape to the canopy 1, wherein the tubes 2 form a diagonal bisection while traversing the canopy 1, at least one cylinder 3 connected to a first end of the tubes 2 for inflating air inside the tubes 2, hence achieving the shape, an actuator 4 mounted on the cylinder 3 for operating the cylinder 3 via a first valve, at least a second valve 5 fitted on a second end of the tubes 2 that is used to release the air from the tubes 2, at least one zipper closure 6 situated at an anterior end of the canopy 1 that allows the user to open/close the canopy 1 and multiple slots 7 crafted at the bottom portion of the canopy 1 for fixing the device on the vehicle via a rope.
