(57) Abstract :

The present invention relates to a vehicle side mirror retrieving apparatus comprising at least two clamping elements 1 installed in the apparatus for securing the apparatus in association with vehicle's side mirror to prevent falling of the mirror during its retrieval, a suction cup 2 enclosed within the clamping elements 1, wherein the cup 2 grips the mirror by creating a suction pressure in order to attach/detach the mirror from a vehicle's frame and a pair of telescopic rods 3 slidably connected with each other, wherein the rods 3 are equipped with a grip handle 4 for manually applying force on the suction cup 2 in order to create the pressure.
