(57) Abstract :

The present invention relates to a torque applying apparatus, comprising a torque wrench having a handle 1 for providing grip to a user while applying torque to a fastener, a movable ratchet body 2 attached to the handle 1 via a pivot joint 3, wherein the ratchet body 2 fastens the fastener to achieve optimum amount of tightness and a pair of retractable arms 4 positioned on either sides of the handle 1 via a hinge joint 5 for precisely tightening the fastener present at inconvenient positions by the user to achieve the optimal tightness.
