(57) Abstract :

A multipurpose load distributing apparatus comprises of a split washer segmented into a primary end 2 and secondary end 3 for distributing load on a fastener, a cavity 5 inside the primary end 2 of the washer body 1 to interlock the primary and secondary end 3, a locking element 4 in association with the secondary end 3 of the washer body 1 that interlocks with the cavity 5 in order to reform the split washer into a flat washer, a ball inside the cavity 5 that gets fixed inside a hole of the locking element 4 in order to secure the interlocking.
