(57) Abstract :

A system for delivering sports related services comprise the steps of a data acquiring unit for collecting input data (i.e. (i.e. name, age, sports) for registering a user a user-platform that fetches a preferred sport type(i.e. cricket) and player specification (such as achievement) from the user for presenting information related to the type and specification, a display panel for displaying a list of matches according to the type and specification to the user, wherein the user selects a match from the list and reserve one or more tickets of the match (like world cup, test series, leagues), a notification module that notifies the user about the matches and left over seats in case the user fails to reserve the tickets to a limited time period through Wi-fi, a ticket selling module that allows the user to re-sale one or more reserved ticket(s), thereby reducing black marketing of the tickets.
