(57) Abstract :

An ankle care device, comprising, a wearable body 1 in combination with a circular rack 2 for accommodating foot of a user, atleast two chambers 3, 4 for dispensing required amount of fluid on the ankle, the nozzles provides passage for flow of one of the fluids, a rolling unit 10 to facilitate massage to the ankle, the primary wheel assists in movement of the rolling unit 10, a brushing unit 11 to facilitate cleaning of the ankle, the secondary wheel provides movement of the brushing unit 11, an Artificial Intelligence (AI) camera 5 for real time monitoring of textures of the ankle, the controller actuates the nozzles according to texture of the ankle, a suction unit 8 for drawing out the wastewater generated while cleaning the ankle; and a drying unit 7 to blow hot air, the actuator 6 provides linear movement to the drying unit 7.
