2)Anikate Gupta

3)Girish Mishra

(57) Abstract :

A conch shell cleaning device, comprising a body 1 installed with a tray 2 that is supported on a pair of motorized sliding rails 3 which assist in sliding of the tray 2 in/out of the body 1, wherein the tray 2 is placed with a conch shell upon sliding out of the body 1, multiple telescopic plates 4 that extends for encasing the conch shell, a water chamber 5 configured with a heating element, wherein the heating unit heats the water to an optimal temperature, a compartment 6 attached to the chamber 5 that passes a chemical into the water during heating, a nozzle 7 for dispensing the dissolved chemical water for removal of accumulated dust/dirt inside the shell, an extendable suction unit 8 for absorbing the dispensed chemical water, wherein the unit 8 is installed with a filter that filters out the dust/dirt from the water during suction.
