(57) Abstract :

A body 1 having multiple cavities 2 to accommodate different gemstone, a motorized slidable lid 3 arranged on each of the cavities 2 for preventing accumulation of dust/dirt on surface of the gemstone, an AI (artificial intelligence) enabled imaging camera 4 integrated with a controller for capturing images of shape, size of the gemstone, wherein the controller on processing the images generates a command to actuate the motorized lid 3, a V- shape frame 5 mounted with a motorized pinion 6 and attached to end portion of the body 1, wherein the motorized pinion 6 rotates over the frame 5 to fasten/unfasten the frame 5 as per size of wrist of a user, a telescopically operated brush 7 affixed to the frame 5 for cleaning the gem stone, wherein the brush 7 actuates upon pressing of a button by the user, plurality of nozzles integrated within the brush 7 for dispensing a cleaning agent on the gemstone via a pump.
