(61) Patent of Addition to Application Number	:NA	
Filing Date	:NA	
(62) Divisional to Application Number	:NA	
Filing Date	:NA	

(57) Abstract :

A frame 1 having plurality of robotic wheels 2 for assisting in movement of the frame 1, an AI (artificial intelligent) module 3 for monitoring real time activities on the surface, wherein the controller on processing the activities generates a command to actuate the wheels 2, a chamber 9 possessing plurality of nozzles 10 for providing a passage for flow of heat on the surface via multiple fans, a heating unit 11 mounted on a pair of sliders 12, wherein the unit 11 showcase sliding movement over the sliders 12 to aid in loosening contact of the paint from the surface, multiple telescopically operated blade unit 4 affixed to a roller 5 for stripping paint from the surface, a suction unit 6 placed adjacent to the unit 4 for engulfing the stripped paint from the surface, a telescopic motorized sanding unit 7 mounted on a slider for abrading the surface.
