(57) Abstract :

A housing 1 having a slidable lid 2 for providing a passage to feed dough, an extendable piston unit 3 mounted on upper portion of the housing 1 for pressing the dough to form noodles, plurality of holes 11 for providing a path to protrude the noodles, a first and second blade 12, 13 installed within the holes 11, wherein the first blade 12 trims the noodles and the second blade 13 aids in removing floured dough on the holes 11 via multiple pins 14, an AI enabled image capturing module 4 integrated with a controller for capturing images of size of the noodles, wherein the controller on processing the images generates a command to actuate the blades 12,13 , plurality of nozzles 5 assembled on upper portion of the housing 1 for spraying water, a pump for actuating the nozzles 5 to dispense the water.
